installation

SUNEX®

A leading manufacturer of innovative solutions

based on renewable energy.

Sunex GmbH is a subsidiary company of SUNEX S.A. from Upper Silesia. A reliable and innovative manufacturer of solar thermal, heat pumps and photovoltaic elements. The company has over 20 years of experience in the field of renewable energy production and development. Constant monitoring of the production process in conjunction with our strict quality management system guarantees high quality and reliable products.

In view of the growing interest in solar energy, we are constantly expanding and improving our range of products with other high-quality, cost-effective and environmentally friendly ways of generating energy. We are constantly investing in new developments so that we can always offer you high-quality and efficient products.
